

MOVENTO®

Suddenly insecticides are moving in a new direction

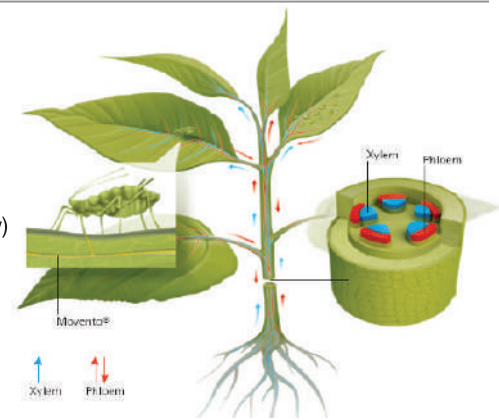

Benefits of Movento®

- // Wide spectrum, two-way systemic effectivity on sucking insects
- // No cross resistance with existing products
- // Long lasting control
- // Not harmful to beneficials

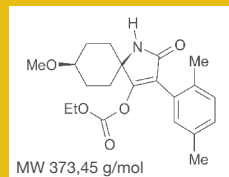

Unique two-way systemicity

There are two transportation systems in plants: xylem (one-way upwards flow) and phloem (two-way up- and downwards flow). Movento® moves in both systems.

Movento® controls sucking insects

General name: Spirotetramat
Chemical class: Tetramic acid
Mode of action: Inhibits the lipid biosynthesis process
Formulation type: SCs, Ods
IRAC group: 23

Excellent two-way systemic action

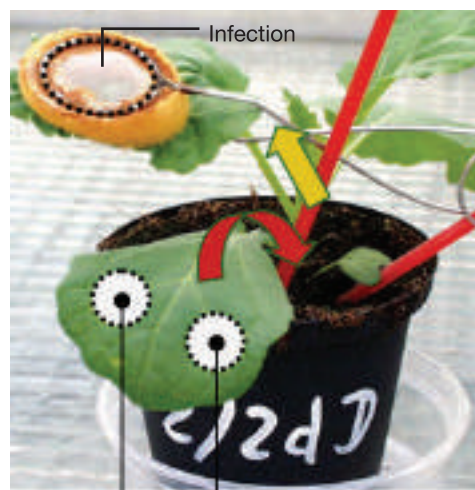

Myzus persicae
(Second instar)

Application area:
First true leaf

Infected area:
Third true leaf

Assessment:
Five days after application,
% control

Movento®-application area

Insecticide	% Control on third true leaf		
	100µg*	20µg*	4µg*
Movento®	100	100	95
imidacloprid	10	0	0
thiamethoxam	0	0	0
acetamiprid	0	0	0
flonicamid	0	0	0
pymetrozine	0	0	0

* Dosage applied on first true leaf

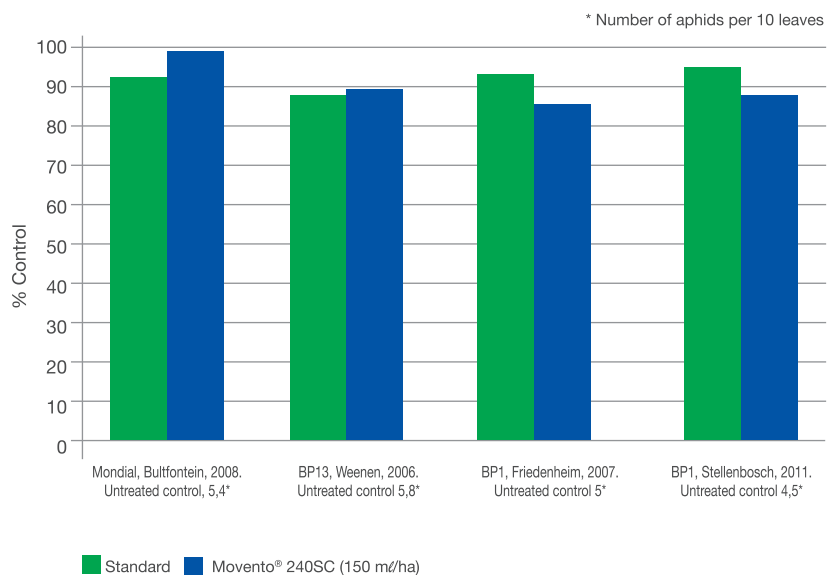

Crop and insect spectrum

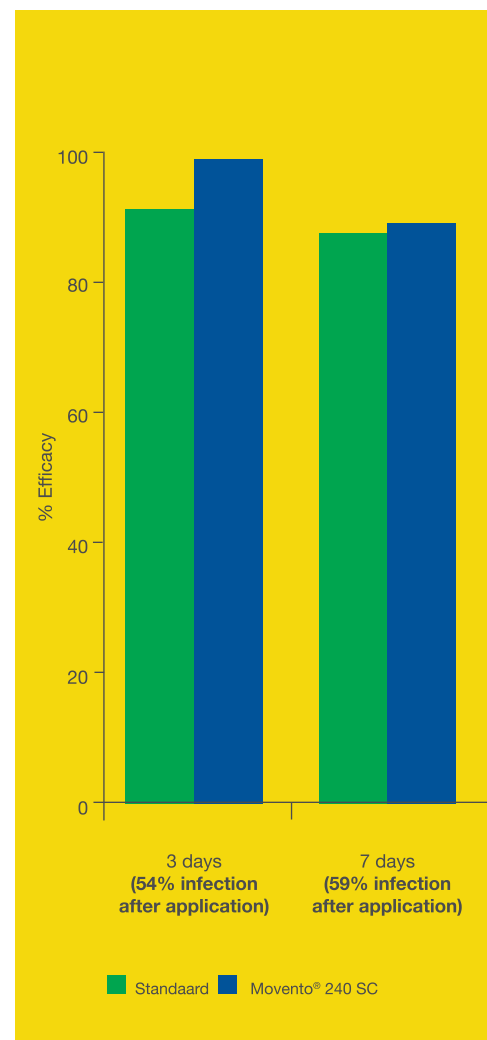

Crop	Potatoes	Cucurbits	Capsicum & aubergine	Leafy vegetables	Brassicas
Aphids	X	X	X	X	X
Whitefly		X	X		X

Movento®'s efficacy on potatoes

Excellent control of aphids

Pollinator safety

// Movento® is safe to honey bees if it is used according to instructions on label.

Movento® Reg. No. L8559 (Act No. 36 of 1947). Movento® contains Spirotetramat (Caution). Movento® is a registered trademark of Bayer AG, Germany. Use strictly according to instructions on label.
